Technical Skills

Work Experience

— Full Stack Developer | May 2016 - Present Palatine Analytics

Palatine Analytics is an Harvard based start-up, which created an advanced employee evaluation software that enables companies to improve performance reviews.

I designed and built their public website, which is fully responsive and incorporates modern design features. Currently, I am working on product improvement, adding new features, testing and fixing bugs. Most of the coding is done in latest Javascript (ES6) using full-stack Meteor framework

— Full Stack Developer | August 2016 - Present Continental City Loan

Continental City Loan is a leading microfinance company in Georgia, which is also present in Ukraine and Kazakhstan.

I built three fully responsive websites for the company, Currently, I am working on server-side optimization for their credit management module.

— Freelance Full Stack Developer May 2016 - Present

I work on freelance projects on a regular basis, mostly using NodeJs/Meteor and React.

— Front-End Developer | January 2016 - May 2016 AUBG Spaces

AUBG SPACES is a student club which helps NGO's and other student organization, by creating elegant and modern websites for free. We developed using AngularJS, with Ruby on Rails.
