DevOps (AWS/Docker/k8s)	HTML5/CSS3/Sass	Tooling (Parcel/Babel)	MongoDB/SQL
Git and Github	Rust	Haskell	Python3

Work Experience

Full-Stack Developer

In The Pocket, June 2019 - Present

In The Pocket is a leading digital studio in Belgium. I am working on products for several popular Belgian apps and websites with eclectic tech stack. Throughout my time here I have created products with Nodejs, React, React Native, Go, .NET, Python, Docker, and Kubernetes.

Full-Stack Developer

Sofitto, April 2017 - May 2019

Sofitto is a Belgium based company, for which I was developing various blockchain-based applications. Other than standard web stack(React, Nodejs, MongoDB), I specialized in Ethereum's Solidity language and worked on several projects using React Native.

Full-Stack Developer

Continental City Loan, August 2016 - April 2017

Continental City Loan is a leading microfinance company in Georgia, which is also present in Ukraine and Kazakhstan. I built three fully responsive websites for the company. Also worked on their core software rewrite.

Full-Stack Developer

Palatine Analytics, May 2016 - September 2017

Palatine Analytics is a Harvard based startup, which created an advanced employee evaluation software that enables companies to improve performance reviews. I designed and built the company's public website. The codebase is written in the latest Javascript(ES6) using a full-stack Meteor framework.

Front-End Developer

AUBG Spaces, February 2016 - May 2016

AUBG Spaces was an university student club, which was providing Web Development services and consultations to NGOs and other student organizations. Our main stack was Ruby on Rails and AngularJS, with me mostly working on the Frontend side.
